IMPact@SUTD is a regular update featuring works by SUTD Faculty, Researchers, Students and Research Centres/Labs. We hope to create awareness of the Research by SUTD within the SUTD community and beyond. Share with us your SUTD works today so that we can include it in our next update.

Battle of the Attack Detection Algorithms: Disclosing Cyber Attacks on Water Distribution Networks
Journal of Water Resources Planning and Management

SUTD Author: Riccardo Taormina, Stefano Galelli, and Nils Ole Tippenhauer

“The BATtle of the Attack Detection Algorithms (BATADAL) is an international competition—organized by SUTD—to compare the performance of algorithms for the detection of cyber attacks on water supply systems. In this paper, we describe the BATADAL problem, algorithms, and results, and propose new ideas for future research.”

Effects of Interface Shear Strength during Failure of Semicoherent Metal-Metal Nanolaminates: An Example of Accumulative Roll-bonded Cu/Nb
Acta Materialia

SUTD Author: Ihor Radchenko, H.P. Anwarali, Sasi Kumar Tippabhotla and Arief Budiman

“We have found how to delay fracture of metal nanocomposites made from alternating Cu and Nb layers. The crack growth across the Cu/Nb interface can be stopped when the layers are easy to slide and the composite grain size is sufficiently large.”

Smart lighting system using ANN-IMC for personalized lighting control and daylight harvesting
Building and Environment

SUTD Author: Nandha KumarKandasamy

“With increase in demand for satisfying occupant preferences in visual comfort, the need for personalized lighting in the office space is also rising. We proposed a novel and unified method that can achieve the desired personalized settings without compromising the efficiency, with extended application to lighting accessories such as blinds.”
