For publishing the paper *\*Solar energy and regional coordination as a feasible alternative to large hydropower in Southeast Asia* in *Nature Communications*.

\*The study shows that only 82% of the planned hydropower dams in the Mekong River basin, a major biodiversity hotspot, are actually needed. In fact, it would be possible to halt the construction of all planned dams without major implications on the cost of electricity.

**Intelligent Shifting Cues: Increasing the Awareness of Multi-Device Interaction Opportunities**  
*UMAP 21*

SUTD Author: Ngoc Thi Nguyen and Simon Tangi Perrault

"Shifting cues can inform users how available nearby devices can be used to enrich interaction, e.g., casting the web search results from your smart phone to an idle nearby smart display. This paper discusses how to design and deliver such cues to users while mitigating interruption to their tasks."

--- Ngoc Thi Nguyen

**Versioning for parametric design exploration process**  
*Automation in Construction*

SUTD Author: Verina Cristie and Sam Conrad Joyce

"Versioning tool is typically used for managing software code versions. We presented a bespoke versioning tool for parametric models' version control, cross-iteration versions comparison, feedback platform, and design project analytics. Application in a design workshop showed student's positive responses to versioning as a personal documentation and group collaboration tool."

--- Verina Cristie

**High-resolution light field prints by nanoscale 3D printing**  
*Nature Communications*

SUTD Author: John You En Chan, Qifeng Ruan, Hongtao Wang, Hao Wang, Wang Zhang and Joel K. W. Yang

"A promising solution to create high-resolution LFPs is through the use of advanced nanofabrication techniques. Here, we use two-photon polymerization lithography as a one-step nanoscale 3D printer to directly fabricate LFPs out of transparent resin. Our LFP signifies a step towards hyper-realistic 3D images that can be applied in print media and security tags for high-value goods."

--- Joel K. W. Yang
